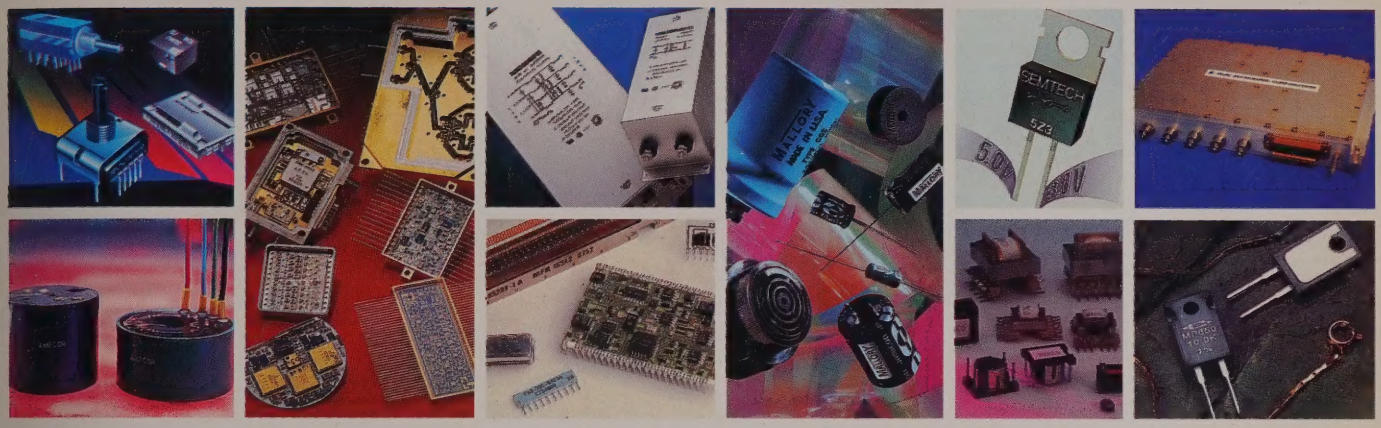
electronic engineers master catalog

VOLUME A



electronic components

36th EDITION

1500 Capacitors
1800 Coils, Chokes, & Inductors
1850 Cores, Magnets, & Ferrites
2300 Crystals, Oscillators, Crystal & Piezoelectric Filters
2350 Delay Lines
2700 Filters, Power
2750 Filters, RF & Signal
3130 Integrated Circuits, Hybrid Circuits, & Function Modules
3450 Microwave Components, Systems, & Equipment
4700 Resistors
4750 Potentiometers, Trimmers, Controls, & Rheostats
4800 Discrete Semiconductors
5600 Transformers

volume B Electromechanical, electro-optical, and military components

volume C Interconnections, packaging, and hardware

volume D Power sources, instrumentation, computer products, and equipment

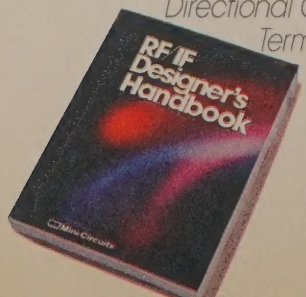
Eliminate weeks or even months of shipment delays for RF/IF signal-processing components…just one phone call to a Mini-Circuits' Distribution Center guarantees shipment within one week.

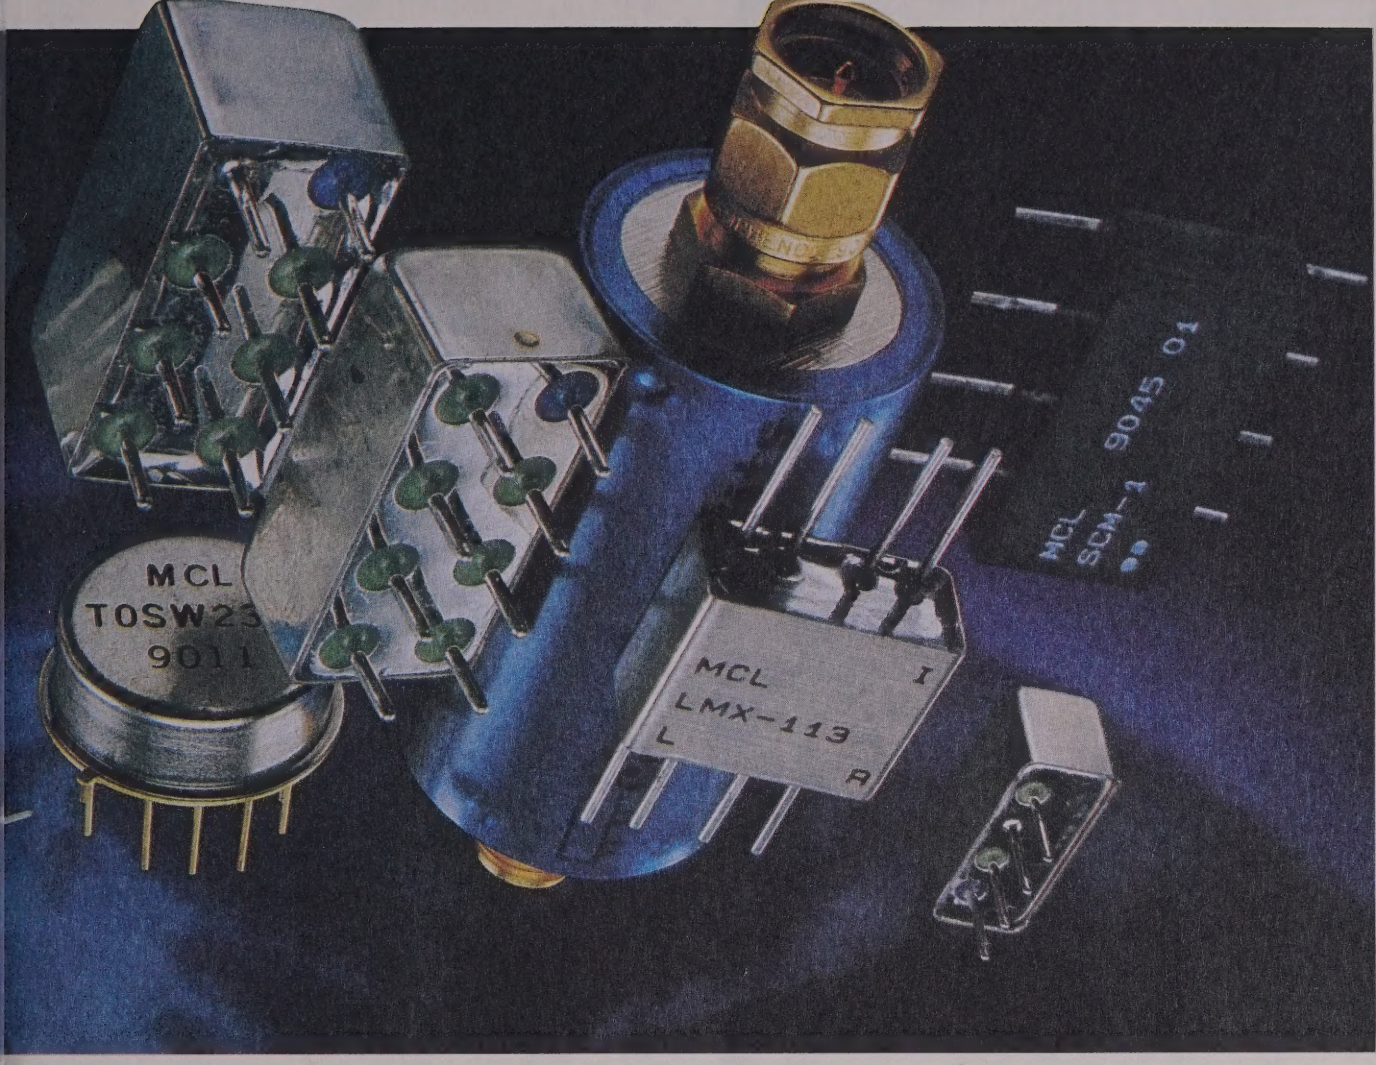
All Mini-Circuits' components listed in the latest published catalog, in all configurations, mounting options, and connector types will be processed and shipped within one week after an order is received, or if the order calls for scheduled assignments, we will ship on or before the due date. If we're late subject to the Conditions of Guarantee, we'll give a discount of 1% per day from your bill (maximum 25%, as allowed by law); but don't count on this discount since we intend to meet each and every scheduled shipment. Although we guarantee one-week turnaround, two days is our target and for rush orders only one day.

What makes this rapid turnaround possible? First, fast manufacturing throughput achieved through powerful statistical process-control techniques coupled with the latest computer-automated production and test equipment. Second, a worldwide distribution network with major Distribution Centers in the U.S. and England.

Guaranteed order processing is another expression of Mini-Circuits' dedicated effort for world-class quality…meeting and exceeding customers' expectations. Write, phone, or fax your order and be confident that it will be shipped on time, every time by Mini-Circuits.



Our new 740-pg Handbook is packed with application articles, conversion charts, selection guides, and the industry's most comprehensive specs, performance data and curves.
Call, write, or fax for your free copy.



RF/IF CATALOG PRODUCTS ONE-WEEK... GUARANTEED!

For U.S. Customers

To provide superior customer convenience and fast delivery, our Distribution Center is open 12 hours a day (8Am to 8PM for East Coast and 5AM to 5PM for West Coast customers). For West Coast orders, Federal Express Priority 2 service is offered at UPS ground rates. And, of course, all prices are the same as quoted from the factory.

For European Customers

To provide superior customer convenience, our Distribution Center in the UK (Wharf Rd., Frimley Green, Camberley, Surrey, GU16 6LF) is open from 8:30AM to 5:30PM. And, exclusive of duty and freight, all prices are the same as quoted from Mini-Circuits' factory.

Conditions of Guarantee

- DISCOUNT: 1% per day will be discounted from the bill (maximum 25%, as allowed by law) if components listed in the latest catalog are not shipped within one week after an order is placed or if a scheduled order is shipped after the due date, subject to the Conditions of Guarantee.
- ORDER PLACEMENT—guarantee applies only to orders placed with Distribution Center.
- ORDER REQUIREMENT—guarantee starts after all details of the purchase order are received complete.
- SHIPMENT TIME—guarantee applies for work days Monday through Friday, holidays excluded.
- TRANSPORTATION—does not apply to situations where shipping is inhibited due to strikes, weather, or conditions beyond our control.
- GOVERNMENT REGULATIONS—does not apply to purchase orders inhibited by government rules, regulations, export licenses, and/or customs approval.
- QUANTITIES—guarantee applies to normal distribution quantities, which vary according to product line.
- CREDIT RATING—guarantee limited to companies with approved credit rating at time of shipment.
- LETTERS OF CREDIT—guarantee limited to meeting terms of LC.

THE SOLID SOURCE

signal processing components dc to 8GHz

In today's tough competitive military and commercial markets, Mini-Circuits provides you that extra edge. From your initial design to full-scale production, we offer total support to satisfy or exceed your specific requirements.

- **WIDEST SELECTION OF COMPONENTS** 14 product lines with more than 1,000 off-the-shelf catalog models.
- **EXTENSIVE DATABASE** actual performance data on all catalog items plus 5,000 custom models.
- **STRONG APPLICATIONS SUPPORT** an engineering team ready to recommend optimum catalog models, discuss custom designs, and provide solutions to your specific needs.
- **ONE-WEEK SHIPMENT GUARANTEE** catalog items will be shipped in one week or less or we'll deduct 1% each day we're late.
- **UNRIVALED QUALITY** statistical process control with 4.5-sigma repeatability on most models, 5-year guarantee on all Ultra-Rel® mixers.
- **UNMATCHED PRICES** often thirty to fifty percent lower than the competition.
- **HIGH-VOLUME CAPABILITY** worldwide manufacturing facilities to supply large-quantity production needs on short notice.
- **CONSISTENT NEW PRODUCT DEVELOPMENT** to meet our obligation to support your future designs.

how to use eem

The 36th edition of EEM is arranged in four volumes each composed of related Product Sections. For user convenience, each volume contains its own Product Index and Directory (green pages) and its own Manufacturers and Sales Offices Directory (yellow pages). Every Product Heading and every manufacturer of electronic products is listed in each volume. Where, however, the Product Section is assigned to a volume other that that in use, a cross reference is made to the appropriate volume for further information.

To locate a specific product. Start by choosing the volume whose title describes the class of electronic product you are seeking. If you are not sure which volume is appropriate, pick up the first one at hand and look up the product heading in the green pages. There you will find either a list of that product's manufacturers or you will be referred to the proper volume. All products are identified by their generic terms. Please read the instructions on the first page of each section. Manufacturers with catalog data pages in this edition of EEM appear in boldface type and page numbers are shown. Manufacturers appearing in lightface type have submitted verifying evidence that they supply the products shown. When you have located a product of interest, turn to the page(s) shown for further information. You will find these pages in each volume in the appropriate sections.

product selection guides

There are 37 Product Selection Guides included in this edition of EEM. They are located on the first pages of the Product Section to which they apply. Use these guides for basic selection parameters and then go to the EEM pages shown in the guide for more detailed information.

product selection index

Product Section Guide		Vol. A	Vol. B	Vol. C	Vol. D
1100	Amplifier Assemblies, Instrumentation				D•1002

advertisers' index

To find a specific manufacturer's data pages, an alphabetical index of EEM participants appears in EEM starting on page **A•5** of Volume A and on pages **B•5**, **C•5** and **D•5** of the other volumes.

EEM 93 94

manufacturers' index

In the EEM yellow pages you will find pertinent details on all manufacturers listed in EEM including local sales offices and/or distributors. Please refer to the detailed instructions on the first page of the EEM yellow pages for additional information.

to order a product found in eem

When you have located the product that suits your needs, call the manufacturer or the local sales rep or distributor as shown in the EEM yellow pages. Give the EEM data page number and specs from that page. You and the supplier will be talking on the same wave length which should simplify your ordering and buying.

to file manufacturers' catalogs and data

The EEM File System is revised and updated to reflect changes in EEM itself. Each new EEM File System contains a complete Product Index. This index tells you where to file which catalog. It also contains a cross reference identifying what should be filed in each section. In order to use the EEM File System all you need is a supply of standard letter size, third-cut manila file folders. You then use the pressure sensitive labels which are supplied with the system to go into as much detail as you want or need.

Each label fits the third-cut file folder exactly. There are over 300 of these labels in each system: one for the index, one each for the EEM Product Sections, 24 for the alphabetical file of multiproduct catalogs, plus more than 200 additional labels for system expansion. The EEM File System also includes Cross Reference Cards so you can quickly and easily find multiproduct catalogs. The EEM File System is complete and can save you countless hours of time and thousands of dollars. Send your check for $25.00 to: EEM File System, 645 Stewart Ave., Garden City, NY 11530 and we'll absorb postage and handling. Send a purchase order and add $5.00 for postage and handling. NY, CA and MA residents, please add sales tax.

93
94 Product Index and Directory

All products are listed alphabetically by their generic names and then by subclassification. For example, look for "Fiber Optic Connectors" under "Connectors, Fiber Optic" or for "Digital Panel Meters" under "Meters, Panel (Digital)."

Following each product heading is a four-digit number directing you to the Product Section where these products are usually cataloged. If that Product Section is not in the EEM volume you are using, a "See Vol. A, B, C, or D" will direct you to the proper volume for your product classification. No numbers appear with cross-reference headings.

Under each product heading whose Product Section appears in the volume you are using, the names of the manufacturers who supply the product are shown in alphabetical order with EEM catalogers shown first in boldface type with appropriate page numbers. Other manufacturers are shown in light face type. The symbol (§) indicates that these products are available from local distributors. The symbol (†) indicates that the product is available to MIL specifications.

Converters, DC to DC, Less than 1 W Output-4025 — *See Vol. D*

Converters, DC to DC, 1 to 5 W Output — See Converters, DC to DC, 1 W to 300 W Output (Vol. D)

Converters, DC to DC, 5 to 10 W Output — See Converters, DC to DC, 1 W to 300 W Output (Vol. D)

Converters, DC to DC, 10 to 15 W Output — See Converters DC to DC, 1 W to 300 W Output (Vol. D)

Converters, DC to DC, 1 W to 300 W Output-4025 — *See Vol. D*

Converters, DC to DC, 30 to 50 W Output — See Converters, DC to DC, 1 W to 300 W Output (Vol. D)

Converters, DC to DC, 50 to 200 W Output — See Converters, DC to DC, 1 W to 300 W Output (Vol. D)

Converters, DC to DC, 100 to 300 W Output — See Converters, DC to DC, 1 W to 300 W Output (Vol. D)

Converters, DC to DC, Greater than 300 W Output-4025 — *See Vol. D*

Converters, DC to Sine/Cosine-2325 — *See Vol. D*

Converters, DC to Synchro-2325 — *See Vol. D*

Converters, Digital to Analog-2325 — *See Vol. D*

Converters, Digital to Paper Tape-2000 — *See Vol. D*

Converters, Digital to Resolver-2325 — *See Vol. D*

Converters, Digital to Synchro-2325 — *See Vol. D*

Converters, Frequency to Frequency-1900 — *See Vol. D*

Converters, Frequency to Voltage-2325 — *See Vol. D*

Converters, Frequency, Logarithmic-4050 — *See Vol. D*

Converters, Frequency Shift Keying-1900 — *See Vol. D*

Converters, Graphic to Digital-2000 — *See Vol. D*

Converters, Multiplying, Analog to Digital & Digital to Analog-2325 — *See Vol. D*

Converters, Paper Tape to Magnetic Tape-2000 — *See Vol. D*

Converters, Phase-4050 — *See Vol. D*

Converters, Polar to Rectangular Coordinates-2325 — *See Vol. D*

Converters, Power Frequency, Electronic-4050 — *See Vol. D*

Converters, Power Frequency, Rotary-4050 — *See Vol. D*

Converters, Pressure to DC, Pressure to Frequency — See Transducers, Pressure (Vol. B)

Converters, Rectangular to Polar-2325 — *See Vol. D*

Converters, Resolver to Digital-2325 — *See Vol. D*

Converters, Rotary — See Motor Generator Sets (Vol. D)

Converters, RS-232/RS-485-2325 — *See Vol. D*

Converters, Serial to Parallel/Parallel to Serial-2325 — *See Vol. D*

Converters, Synchro to Digital-2325 — *See Vol. D*

Converters, Synchro to Linear DC-2325 — *See Vol. D*

Converters, Synchro to Sine/Cosine-2325 — *See Vol. D*

Converters, Telemetry-1900 — *See Vol. D*

Converters, Thermal-5300 — *See Vol. B*

Converters, UHF to VHF-1900 — *See Vol. D*

Converters, VLF to HF-1900 — *See Vol. D*

Converters, Voltage to Frequency-2325 — *See Vol. D*

Converters (MIL) DC to DC-2440 — *See Vol. B*

Converters (MIL), Frequency-2440 — *See Vol. B*

Coolants, Circuit & Component — See Refrigerants, Spray (Vol. C)

Cooling Equipment — See Air Conditioners (Vol. C), Blowers & Fans (Vol. C), Heat Exchangers & Systems (Vol. C)

Cooling/Heating Modules, Thermoelectric-2600 — *See Vol. C*

Cooling Sprays — See Refrigerants, Spray (Vol. C)

Cords & Tapes, Lacing-6000 — *See Vol. C*

Cords, Communication, Control, Microphone, etc. — See Cable, Specific Type (Vol. C)

Cords, Line & Set, Extension-6000 — *See Vol. C*

Cords, Line (Lamp) — See Cable, Multiconductor (Vol. C)

Cords, Line, Resistance-6000 — *See Vol. C*

Cords, Patch-2100 — *See Vol. C*

Cords, Power-6000 — *See Vol. C*

Cords, Retractile-6000 — *See Vol. C*

Cords, Speaker Extension — See Cable, Audio (Vol. C)

Cords, Telephone, Modular — See Cable, Telephone (Vol. C)

Cords, Twin Lead — See Cable, Multiconductor (Vol. C)

Cords & Cable, Dial Drive-2400 — *See Vol. C*

Cords & Cord Sets, Telephone-6000 — *See Vol. C*

Cords & Cord Sets, International-6000 — *See Vol. C*

Crystals (MIL)-2440 — *See Vol. B*

Cups, Encapsulation-1600 — *See Vol. C*

Curing Systems, Photo Magnetic-1600 — *See Vol. C*

Current Limiters (MIL)-2440 — *See Vol. B*

Current Sensors-Also See Transducers, Volt, etc.-2200 — *See Vol. D*

Current Sources-4000 — *See Vol. D*

Custom Molding Services, Plastics — See Services, Custom Molding, Plastics (Vol. D)

Cutters, Diagonal — See Cutters, Manual (Vol. C)

Cutters, Wire, Automatic — See Machines, Wire Measuring & Cutting (Vol. D)

Cutters, Wire, Manual-5400 — *See Vol. C*

Dampers, Servo-4900 — *See Vol. D*

Dampers, Structural, Chassis, Panel, etc. — See Mounts, Shock & Vibration (Vol. C)

Data Acquisition & Reduction Systems-Also See Modules, Data Acquisition-2325 — *See Vol. D*

Data Collection Equipment, Hand Held-2000 — *See Vol. D*

Data Collection Equipment, Modular-2000 — *See Vol. D*

Data Collection Equipment, Portable-2000 — *See Vol. D*

Data Compressors, Digital-2000 — *See Vol. D*

Data Display Indicators — See Displays Indicator Lights (Vol. B)

Data Display Systems — See Displays, CRT (Vol. A), Terminals, Data Display (Vol. D)

Data Links, Fiber Optic-2475 — *See Vol. B*

Data Links, Optical-2000 — *See Vol. D*

Data Loggers-2325 — *See Vol. D*

Data Recording, Hard Disk-2000 — *See Vol. D*

Data Security Devices: Encryptors, Decryptors — See Security Systems, Data (Vol. D)

Data Switches — See Switches, Data (Vol. D)

Data Systems (MIL)-2440 — *See Vol. B*

Data Translators — See Translators, Data

DCXO — See Oscillators, Digitally Compensated Crystal (Vol. A)

Decade Boxes, Capacitance-2900 — *See Vol. D*

Decade Boxes, Inductance-2900 — *See Vol. D*

Decade Boxes, Resistance-2900 — *See Vol. D*

Decade Boxes, Resistance, Programmable-2900 — *See Vol. D*

Decade Boxes, Transformer-2900 — *See Vol. D*

Decalcomania-Also See Labels, Pressure Sensitive-2400 — *See Vol. C*

Decapsulation Services — See Services, Decapsulation (Vol. D)

Decoders, Binary To Decimal — See Converters, Binary To Decimal (Vol. D)

Decoders, Digital To Analog — See Converters, Digital To Analog (Vol. D)

Decoders, Pulse-1900 — *See Vol. D*

Decoders, Readout — See Drivers & Decoders For Readouts (Vol. B)

Decoders, Telemetry — See Decoders, Tone (Vol. D)

Decoders, Tone-1900 — *See Vol. D*

Decoders, Video-1900 — *See Vol. D*

Decontaminants — See Cleaners & Solvents (Vol. C)

Decoys (MIL), Buoy-2440 — *See Vol. B*

Decoys (MIL), IR Flare-2440 — *See Vol. B*

Decryptors — See Security Systems, Data (Vol. D)

Deep Drawn Metal Cases, Enclosures, Stampings — See Cases, Equipment, Instrument, Meter (Portable) (Vol. C), Cases Equipment, Instrument, Meter (Stationary) (Vol. C), Enclosures, Metal (Vol. C), Stampings (Vol. C)

Degaussers — See Demagnetizers (Vol. C), Coils, Degaussing (Vol. A)

Degreasers & Cleaners, Machine — See Machines, Cleaning & Degreasing (Vol. D)

Degreasing Chemicals — See Cleaners & Solvents (Vol. C)

Dehydrators-4100 — *See Vol. D*

Delay Generators — See Generators, Timing Digital (Vol. D)

Delay Lines, Active-2350

1993 IC MASTER *CD-ROM PLUS*

3 reference sources on a single compact disk! **CD-ROM PLUS** is fast, easy to use and very user friendly. It combines all of the Master Selection Guides and all of the Indexes from the printed IC Master with hundreds of additional manufacturers data sheets. **CD-ROM PLUS** also includes the entire Directory of IC Manufacturers' Data Pages plus a powerful Inquiry Generation and Tracking System.

- **You can find the exact IC you need in seconds...**
- **Compare specs on your screen...**
- **Print the search results directly to your computer or printer!**

PLUS...

- **You can access over 1,100 manufacturer's data sheets and send them to your laser printer.**

Published annually in the Spring

CD-ROM PLUS runs on any ISO9660 CD-ROM reader and any IBM AT or better PC (or 100% compatible).

No complex software involved. Start your reader and play CD-ROM PLUS. Once you experience the simplicity and speed of CD-ROM PLUS, you'll never work without it again!

JOIN THE CD-ROM BANDWAGON.

For all the details on how to order your IC Master CD-ROM PLUS, call or write:

MINIGLOSSARY FIBER OPTICS

Acceptance Angle
The maximum angle within which light will be accepted by an element such as a detector or waveguide. In the latter, it is quantified as half the vertex angle of the cone within which optical power may be coupled into bound modes of a fiber.

Aligned Bundle
An assembly of fibers in which the coordinates of each fiber are the same at the two ends of the bundle, also called *Coherent Bundle*.

Bend Radius
The radius of curvature that an optical fiber can bend without breaking.

Bundle
Multiple optical fibers in a single housing used to transmit light or images.

Cladding
The low refractive index material that surrounds the core of the fiber to contain core light while protecting against surface contaminant scattering. In all-glass fibers, the cladding is glass.

Effective Numerical Aperture
The real numerical aperture of a fiber when the computed NA is not valid due to a change in the glass indices during the drawing and fusion process.

Fiber Bundle
A rigid, or flexible, concentrated assembly of glass or plastic fibers used to transmit optical images or light.

Fiber Optic Light Guide
A bundle of optical fibers arranged randomly for the purpose of transmitting energy, not images.

Fiber Optic Probe
A flexible optical probe having a bundle of glass fiber arranged to transmit an image

Gap Loss
The optical power loss caused by space between axially aligned fibers.

Image Transducer
Any arrangement of a bundle of optical fibers that alters the shape of the image.

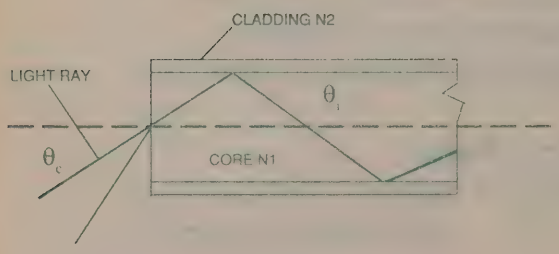
For example, by a systematic regulation of the spacing of the fibers from the entrance end to the exit end, a distortion of the image can occur that may be used to neutralize or compensate for the distortion introduced by the lens, prism or mirror components in an optical system.

Large-Core Fiber
Optical fiber with a large core, often a step-index fiber. "Large" is sometimes defined as greater than 85 μm.

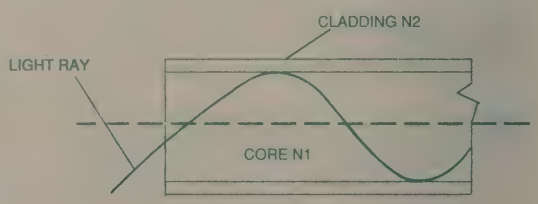
Multifibers
An array of optically distinct fibers that are fused into one strand. They are used to keep the resolution efficiency of the smaller single fibers and eliminate difficulty in handling. Their specific usage is determined by their flexibility or rigidity.

Packing Fraction
The ratio of the active core area of the fiber bundle to the total area at its light emitting or receiving end.

Plastic Fiber
Fiber in which both the core and cladding are made of plastic.



(a) Light propagation in a step index fiber.



(b) Path of light rays in a graded index fiber.

MINIGLOSSARY TIMERS

Accuracy
The variation of unit performance, i.e., time delay, voltage trip point, etc., over the specified conditions of ambient temperature, input voltage range, and time between operations.

Adjustability
The changing of a unit set point, within the specified range of unit operation, by means of internal or external adjustment mechanism (i.e., changing time delay with potentiometer).

Contact Rating
The electrical power-handling capability of relay contacts under specified environmental conditions and for a prescribed number of operations.

Delayed Interval Timing Function
Input voltage is applied continuously. The timing cycle is started by momentarily actuating the control circuit. The functions of separate Delay-On-Operate and interval type timers are combined in one package providing a single OFF-ON-OFF output cycles

Also called: single shot.

Delay-On-Operate Timing Function
Application of the input voltage starts the time delay. At completion of the time delay, the relay contacts transfer.

Also called: Delay-On-Make, On-Delay, Delay Relay, Delay-On-Pickup.

Delay-On-Release Timing Function
Input voltage must be supplied continuously to timer. Actuation of control circuit causes relay contacts to transfer immediately. Time delay starts when control circuit is released. The relay remains energized for the duration of the time delay—then de-energizes.

Also called: Delay-On-Break, Off-Delay, Delay-On-Dropout, Delay-On-Energization.

Frequency Sensor
A device that monitors a predetermined overfrequency and/or underfrequecy condition, and changes output state when these conditions exist.

Hysteresis
The difference between the response of a unit or system to an increasing and a decreasing signal (example: a voltage sensor).

Interval Timer Timing Function
Application of input voltage causes relay contacts to transfer and time delay to begin. At completion of the time delay, the relay contacts return to de-energized state.

Also called: Delay Interval, One Shot.

Output Control
The switching device, either solid-state or electromechanical, used in the unit to control the load connected to the output terminal(s).

Phase Sensor
A device that monitors for proper phase rotation in 3-phase systems.

Programmability
Ability to modify function, time delay or input voltage of a timer.

Recovery Timer

(Delay-On-Operate/Interval Timer)
The minimum time that input voltage must be interrupted *prior* to time-out to insure a successive timing cycle within the specified limits.

(Delay-On-Release)
The minimum duration of time that control circuit must be re-actuated to insure a new timing cycle when the control circuit is released.

Recycle Time

(Delay-On-Operate or Interval Timer)
The minimum time that input voltage must be interrupted after the timing cycle is completed to assure a successive timing cycle within the repeatability specified.

(Delay-On-Release)
The minimum duration of time that control circuit must be actuated to insure a successive timing cycle within the repeatability specified when the control circuit is released.

Repeat Cycle Timer Timing Function
Application of power automatically initiates continuous off-on cycling of the output relay.
Also called: flasher, intervalometer

Reset Time
The time required for the contacts to return to normal position when power is removed.

Reverse Polarity Protection
Blocking circuitry arrangement within the timer to prevent damage or output actuation if reverse polarity input voltage is applied.

Tolerance
The difference between specified and actual timing or sense point (factory setup tolerance).

Transient Protection
Prevents damage to unit if positive or negative transients are applied to the unit. Insures proper operation of the unit during and after transient occurrence. Max. transients are usually specified as to amplitude and duration, i.e., 1000V for 1 second.

Trip Point
The predetermined point at which a sensing device is set to change the output state.

Voltage Sensor
A device that monitors for a predetermined overvoltage and/or undervoltage condition, and changes output state when these conditions exist.

NOMOGRAPH VOLTAGE DROP

NOMOGRAPH OF VOLTAGE DROP ACROSS LOAD SUPPLY LEADS
(as a function of wire size and load current)

THIS NOMOGRAPH CAN BE USED TO FIND:

Maximum current carrying capacity recommended for any standard wire size.*

1) With a straight edge, connect from the wire size on Scale 2 to the point "A" on Scale 3.
2) Read I_{max} on Scale 1.

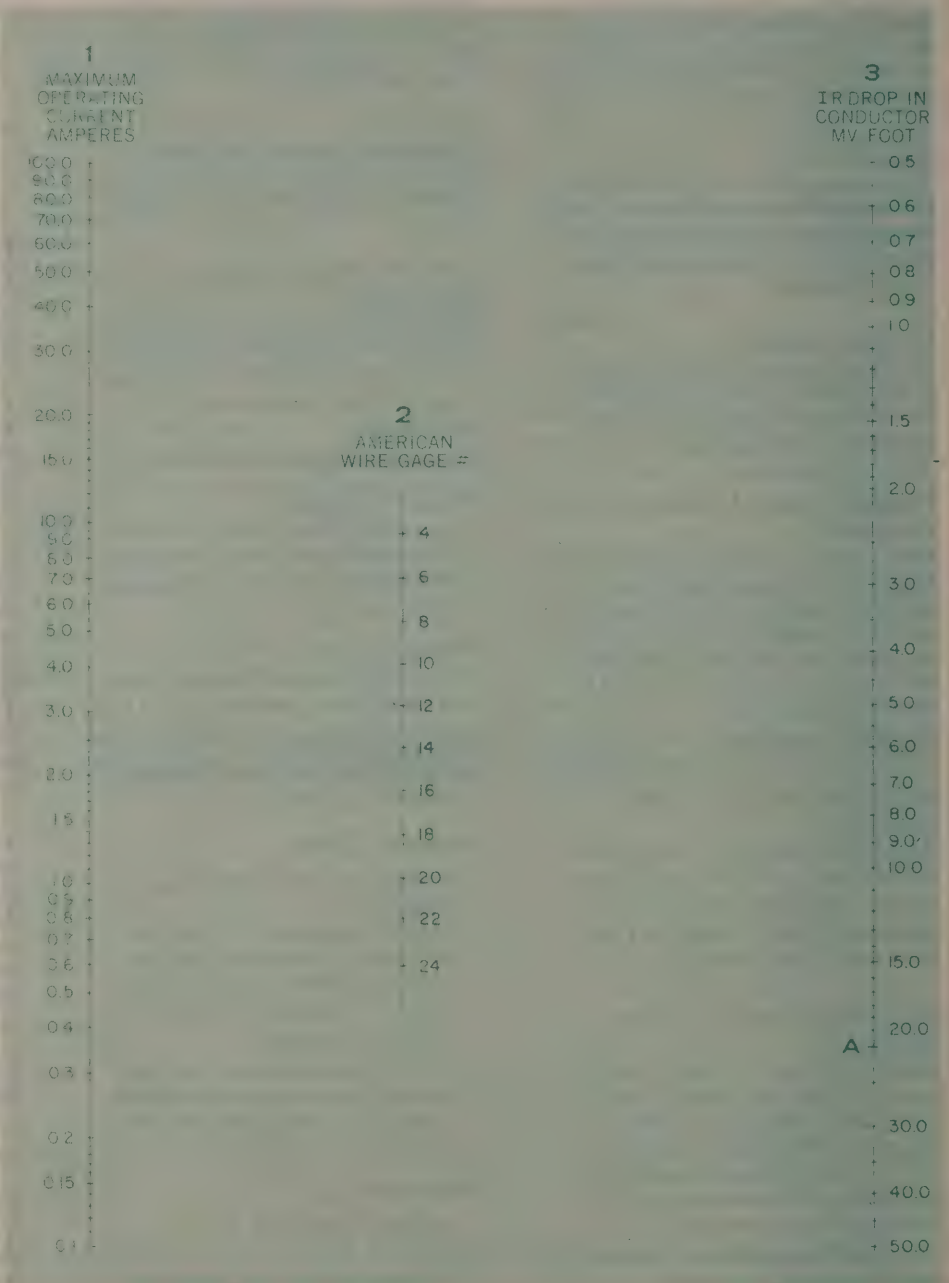
Voltage drop in millivolts per foot for known wire size and operating current.

1) With a straight edge, connect the known current on Scale 1 and the wire size on Scale 2.
2) Read voltage drop on Scale 3.

Wire size required for known operating current and known maximum tolerable voltage drop across supply leads.

1) Determine maximum tolerable drop in millivolts **per foot** of lead (sum of positive and negative leads).
2) Connect the value on Scale 3 (as determined in step 1) to the known current on Scale 1.
3) Read wire size on Scale 2.

** Based on an arbitrary minimum 500 circular mils per ampere. High-temperature class insulation will safely allow higher currents.*



NOTE: A voltage stabilized Power Supply controls the voltage across its output terminals. Hence, the wire conductors used to connect the load must be considered as part of the load. At high load currents, the voltage drop across the supply leads may appreciably degrade stabilization at the load. Kepco models equipped with the *remote error sensing* feature can automatically compensate for voltage drops of up to 500 mV across each load supply lead.

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

ICMASD

Alternate Source Directory

The all new 1993 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1993 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. The 1993 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 51/4" double-sided, double-density disks OR on one 51/4" high-density disk OR on one 31/2" high-density disk.

Published annually in March

FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

To order your 1993 ICMASD,
contact your local IC MASTER distributor or, send your purchase order and check for $179.50 plus tax* to:

Marie Botta
Hearst Business Publishing
645 Stewart Avenue
Garden City, NY 11530
(516) 227-1300 • FAX (516) 227-1901

*Please add sales tax in NY,MA,IL, CA, or GST tax in Canada
For delivery outside the USA, please add $20 per ICMASD.

For faster service, have your VISA or MasterCard handy, and call our CREDIT CARD HOTLINE: 1-800-833-7138

93
94 Manufacturers and Sales Offices Directory

Each manufacturer is listed alphabetically with complete address and telephone number of main offices. The names of those with data pages in this edition of EEM are shown in **boldface**

Many manufacturers also show FAX, TWX and Telex numbers, FSC (Federal Supply Code), other pertinent company data, their sales and/or local distributor offices and phones. The page numbers of their data pages in this edition are shown in all volumes.

Advertisement

Our line of turnable RF coils affords highest Q and stability in filter applications from audio thru VHF. Values of .027 to 100,000 uH spaced in a 10% series have overlapping turning ranges. We also make wideband matching transformers, power splitter combiners. Directional couplers, audio transformers, fixed and tunable filters. We will also design and fabricate any of the above items to your specific requirements.
